2020 Inspec Thesaurus and Classification Code Changes

About Thesaurus and Classification Codes

The Inspec Thesaurus and Classification scheme are valuable search tools to help you refine your search results.

The Thesaurus contains over 9980 Index Terms and is a terminology based subject index. The Index Terms are themselves interrelated to allow you either to find the most exact term(s) to add to your search or to broaden out your search with additional terms.

The Inspec Classification is a subject categorisation scheme containing over 3500 Classification Codes. These codes can be used to specify a subject area without needing to specify all the sub-concepts that might be used to define it, and to restrict the results of Index Term searches which may cross subject areas.

About Revisions

Inspec regularly assesses and updates these taxonomies in line with advances in scientific and technological terminology and changes in the focus of research.

New Classification Codes may be added to allow access to formerly hard to access concepts and codes may be amended to reflect changes in terminology or to make explicit indexing practice. For 2020, four new codes are being added and all codes under Section D are being retired:

Please note: From 1st January 2020, we will no longer be using the subject classifications under "D: Information and Technology for Business" to index content in Inspec. All relevant content will continue to be indexed under other appropriate subject classifications. Section D codes will remain searchable for content indexed prior to this date.

If you have an interest in searching Inspec for material related to this subject area, alternative classification codes can be found in Sections B (Electrical Engineering and Electronics), C (Computers and Control) and E (Mechanical and production Engineering). A List of these classifications can be found below. Any alerts, or saved searches, which include Section D classifications, should be amended accordingly.

Similarly new Index Terms may be introduced to allow new concepts to be specified, to subdivide growing research areas, or to match changes in the terminology of the material being indexed. 21 new Index Terms are being introduced for 2020. In addition, 84 concepts are being added which are synonyms, or explain, and lead to the Index Terms to use for those concepts. There are also a number of corrections and additions to the inter-term and code-term relationships. There are no Index Terms being retired.

The improved Thesaurus and Classification tools containing all these changes will be available in January in time for the first update of 2020.

Changes for 2020

If your Saved Search (or Alert) contains Full Terms or Classification Codes from the following lists, you may wish to consider the related new concepts for addition into your strategy.

<u>List of New Classification Codes linked to Pre-2020 Practice</u>

Pre 2020	New Code	New Code Text
Code		
A9870	A9870T	Cosmic gravitational wave sources
A9880D	A9880N	Dark matter
A9880D	A9880M	Dark energy
A9880D	A1480L	Dark matter candidates

<u>List of New Index Terms Linked to Pre-2020 Terms</u>

Pre 2020 Index Term	Relationship	New Index Term
5G mobile communication	Related term	6G mobile communication
accelerometers	Related term	fall detection
administrative data processing	Related term	data governance
alarm systems	Related term	fall detection
application specific integrated circuits	Related term	Al chips
archaeology	Related term	excavation
artificial intelligence	Narrow term	Al chips
assisted living	Related term	fall detection
autonomous underwater vehicles	Related term	marine robots
Bayes methods	Narrow term	naive Bayes methods
belief maintenance	Related term	belief propagation
belief networks	Related term	belief propagation
biomechanics	Narrow term	fall detection
biomedical communication	Related term	fall detection
boats	Related term	marine robots
body sensor networks	Related term	fall detection
building standards	Related term	IET standards
business data processing	Related term	data governance
canals	Related term	excavation
catalysis	Narrow term	electrocatalysis
catalysts	Narrow term	electrocatalysts
cellular radio	Related term	6G mobile communication
CMOS integrated circuits	Related term	neuromorphic engineering
cognitive systems	Related term	fuzzy cognitive maps
construction industry	Related term	excavation
coprocessors	Related term	Al chips
data handling	Narrow term	data governance
data handling	Narrow term	open data
data integrity	Related term	data governance
data mining	Related term	naive Bayes methods

data models	Related term	data governance
data privacy	Related term	data governance
data protection	Related term	data governance
database theory	Related term	data governance
decision making	Related term	fuzzy cognitive maps
directed graphs	Narrow term	fuzzy cognitive maps
DP management	Related term	data governance
elasticity	Narrow term	rigidity
electric vehicles	Related term	IET standards
electrical installation	Related term	IET standards
electrical safety	Related term	IET standards
electrochemical electrodes	Related term	electrocatalysts
electrochemistry	Narrow term	electrocatalysis
electrochemistry	Related term	electrocatalysts
electronic publishing	Related term	open data
emergent phenomena	Related term	systems of systems
energy management systems	Related term	IET standards
enzymes	Related term	electrocatalysts
excavators	Related term	excavation
field programmable gate	Related term	Al chips
arrays		
food waste	Related term	municipal solid waste
foundations	Related term	excavation
fuzzy logic	Related term	fuzzy cognitive maps
fuzzy reasoning	Related term	fuzzy cognitive maps
fuzzy set theory	Related term	fuzzy cognitive maps
fuzzy systems	Related term	fuzzy cognitive maps
geotechnical engineering	Narrow term	excavation
geriatrics	Related term	fall detection
government data processing	Related term	open data
government policies	Related term	data governance
government policies	Related term	open data
graph theory	Related term	belief propagation
graphics processing units	Related term	Al chips
gravitational waves	Related term	gravitational wave sources
handicanned aids	Polated term	(astronomical) fall detection
handicapped aids	Related term	
home automation	Related term	fall detection
image motion analysis	Related term Related term	fall detection fall detection
image recognition		
incineration	Related term	municipal solid waste
industrial waste	Related term	municipal solid waste
inference mechanisms	Narrow term	belief propagation
inference mechanisms	Related term	fuzzy cognitive maps
injuries	Related term	fall detection
